***Allowable Subject Matter***

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one skilled in the art a polarizing illumination optical system comprising, in order a light source that includes a parabolic reflector, a polarization conversion optical system and an integrator optical system wherein the polarization conversion optical system satisfies the following condition:

$$4f < D < 7f$$

where  $f$  is the focal length of the parabolic reflector and  $D$  is the minimum width of the optical incidence aperture of the polarization conversion optical system.

4. The references: USPAT 6,552,760 AND USPAT 6,631,992 and US 2003/0160925 disclose a polarization illumination optical system comprising, in order: a light source that includes a parabolic reflector, an integrator and a polarization conversion optical system which is different than the claimed structure. Also, the references USPAT 6,123,424 and US 2002/0176255 (Fig. 17) disclose a polarizing illumination optical system comprising, in order a light source that includes a parabolic reflector, a polarization conversion optical system and an integrator optical system as claimed. However, all of the references alone or in combination fail to teach or suggest that the polarization conversion optical system satisfies the following condition:

$$4f < D < 7f$$

where  $f$  is the focal length of the parabolic reflector and  $D$  is the minimum width of the optical incidence aperture of the polarization conversion optical system in combination with all other recitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
